

FUTURE MAKER MOBILE LEARNING LAB

WSU Tech and Goodwill Industries of Kansas, Inc. worked together to develop the FutureMaker Mobile Learning Lab. In this mobile lab students will experience actual and virtual tools that are used in STEM (Science, Technology, Engineering and Math) careers identified as high-demand throughout Kansas and the United States. The lab will capture the interest of all ages through exploration of STEM education using virtual reality, information technology and hands-on experiences and challenges.

The lab also carries a set of zSpace 3D computers which provide students a virtual learning environment in which to do experiments and challenges.

Who:

Adults, Non-Member &
Member Welcome

When:

April 9, 2019 7:00p-8:30p

Where:

Clarion Inn Parking Lot
1911 Kansas Ave.
Garden City KS, 67846

**PRESENTED
BY**
girl scouts
of kansas heartland

Students use equipment such as a virtual welder to simulate metal repairs/fabrication, a virtual painter to get a sense for aviation/automotive commercial coatings, and actual tools used in the fabrication of aircraft
